## Accessories

EZ-Pulse:

This rugged portable sending unit is perfect for rental cars and other temporary installations. The EZ-Pulse mounts on a hubcap using a single stud. Die-cast aluminum frame and stainless steel ball bearings insure long life.

Installation on REAR wheel
Do not sever wire!
Attach with cable tie
EZ-Pulse

Basic Sending Unit:

Our standard sending unit (mileage sensor) is designed for permanent mounting on a wheel, hub or axle. Ultra sensitive Hall Effect technology using no moving parts for long life and trouble free operation. Two high strength "rare earth" magnets are included with each sending unit.

Remote Hold Switch:

"Handgrip Style" switch offers remote operation of the hold feature of your ALFA-Elite and will rezero the incremental mileage on your ALFA-Pro. No more reaching for the console as you apex those turns!

Cables:

Custom and standard configurations are available to meet *your* needs.

ALFA-Elite

The ALFA-Elite has long been _the_ rally computer for TSD. Our customers prove it every week by winning rallies and championships around the world. The ALFA-Elite has more features and performance than anything on the market – including computers which cost twice as much!

Some of the ALFA-Elite's features include:
- ✓ User friendly, guess free operation. All feedback is in plain English!
- ✓ "On the fly" corrections to time, speed and distance.
- ✓ Operation in miles or kilometers (to .001), seconds, hundredths or thousandths of a minute.
- ✓ Instant CAS error recalculation.
- ✓ Dual odometer inputs with separate correction factors. Ideal for backup or for paved/dirt factor differences.
- ✓ Automatic 6-digit correction factor calculation.
- ✓ Event logging eliminates paperwork. You always know what you did, when and where.
- ✓ Last HOLD recall.
- ✓ Audible feedback and alarms for distance countdown, park and reverse.
- ✓ Accepts Average Speeds up to 199.9 for Road Racing. "Race Mode" for single driver operation in Road Race applications.
Drivers Display features:
- ✓ High precision digital error readout, _plus_ analog style "Null Meter".
- ✓ CAS reminder display
- ✓ Factor corrected digital speedometer.
- ✓ Incremental, countdown or course odo.
- ✓ Driver's button to re-zero incremental odo.

NO MORE PLASTIC. The Elite and Pro are now constructed of Aircraft Aluminum with a durable baked enamel finish.

ALFA-Pro

Designed for the rigors of Performance Stage rallying, but with all of the features expected for Limited (Unequipped) Class TSD rallying, the ALFA-Pro is the best all around odometer/clock anywhere. Rugged and reliable, the ALFA-Pro will provide years of faithful service.

- ✓ Dual odometers run in miles or kilometers. (to .001)
- ✓ Clock runs in seconds or hundredths of a minute. (Displays to 1/10 sec or 1/1000 min)
- ✓ Six digit, fully automatic correction factor.
- ✓ Dual odometer inputs with separate correction factors. Ideal for backup or for paved/dirt factor differences.
- ✓ Speedometer readout.
- ✓ Easy one-button re-zero of incremental odometer and timer.
- ✓ Time and Distance countdowns.
- ✓ Elapsed timer.
- ✓ Programmable Zero-on-Hold.
- ✓ Performance timer measures 0-60 time and Quarter Mile time and speed.
- ✓ Optional driver's display allows the best possible team coordination. Driver's display continues to run even in "Hold".

So, who is Small Systems Specialists?

We're a family owned small business, originally opened in 1981. The first ALFA brand rally computers rolled off our assembly line in 1983 and we haven't stopped since! We know rallying, because we like to rally – _and win!_

In addition to manufacturing rally computers, we also do all sorts of microprocessor design consulting. Our designs include products for automotive, aeronautical, commercial and military applications.

ALFA-Club

The ALFA-Checkpoint has been the leading edge in rally clock technology since 1983, and this latest model is the best yet! The completely redesigned ALFA-Club not only offers you a rally timer with memories, it is also equipped with a dual odometer!

The ALFA-Club offers all of the great features of the ALFA-Checkpoint, plus a larger display and extra control switch for easier operation.

Here's a few of the Club's great features:
- ✓ Clock in seconds or hundredths of a minute. (Displays to 1/10 sec or 1/1000 min)
- ✓ Memories do not clear without user input! Recalls ALL memorized times as often as you need to.
- ✓ Dual correctable odometers read to 1/1000 miles or kilometers.
- ✓ Simplest possible user interface.
- ✓ Automatic time synchronization.
- ✓ Operates from a standard 9 volt battery or optional 12 volt power cord. (Battery acts as backup when operating from 12 volt source)
- ✓ "Rally Link" ™ serial interface for future connections to PC, Palm and GPS devices.
- ✓ Single action CLEAR for incremental odometer.
- ✓ Larger display characters for better visibility in high pressure situations.
- ✓ Direct access to setup menus.

- ✓ Options include Power Cable, Sync Cable and all ALFA Sending Units
